Quick Installation Guide

Bundled software applications

ArcSoft ShowBiz, with these features:

Video capture for recording video game play

Authoring, trimming and burning your video recordings onto a Blu-ray compatible DVD disk

Upload videos to YouTube

Record your video game play in HD

HD PVR Gaming Edition records high definition video from a Sony® PlayStation®3 or Microsoft® Xbox® 360, onto your PC in a compressed high definition H.264 format.

Make video recordings of your best game play in HD. Upload your favorite games to YouTube and share them with other gamers online. Or make a high definition movie of your game play to share with your friends or use it to discuss tactics with your clan members! You can also play your game play recordings back onto your PC screen or transfer them over your home network for playback on a PS3 or Xbox 360.

Amazing audio and video quality

HD PVR Gaming Edition records using H.264 compression at HD resolutions up to 1080i. And with our optical audio input, you get amazing 5 channel audio quality from your game console.

The H.264 recording format is used by Blu-ray disks and exceeds other compression standards in quality and disk space consumption, providing a crisp image with amazing digital sound. And H.264 uses 1/3 the disk space compared with the popular MPEG-2 format.

With video pass through for no delay recording!

HD PVR Gaming Edition comes with real-time video pass through, so you can watch your game play on your HD TV while recording your game on your PC's disk drive. Simply connect the HD PVR in between your game console and your HD TV set (Component Video HD cables included).

HD PVR Gaming Edition includes a set of Xbox 360 and PS3 component video cables so you have everything you need to get started with recording your game play in HD!

Upload your best games to YouTube and share with your friends

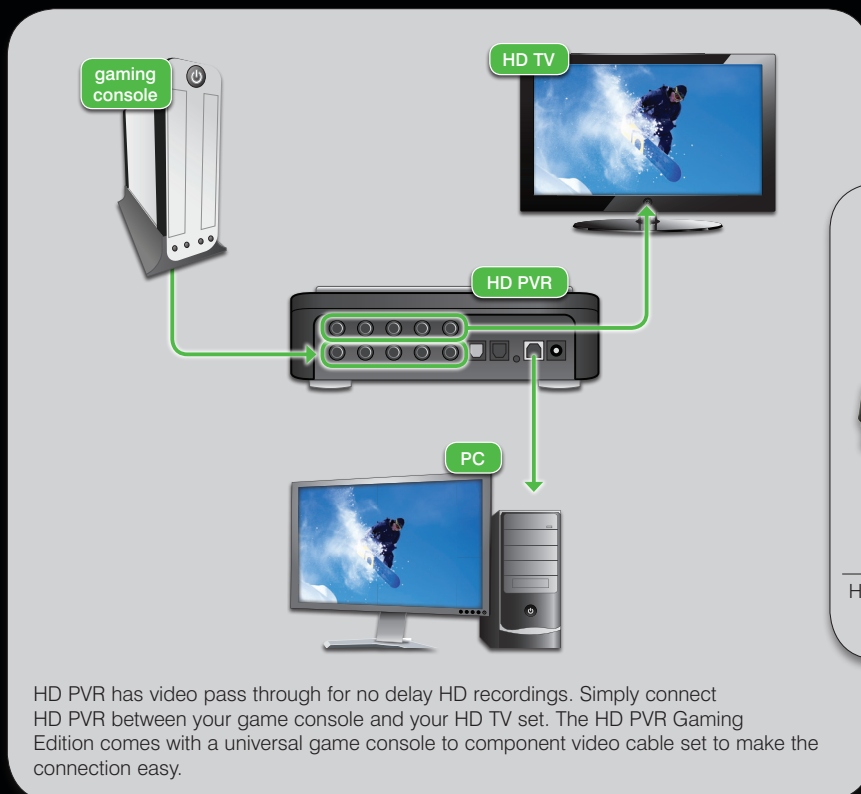

Make an HD recording of your game play, and upload to YouTube with the included Arcsoft ShowBiz. HD PVR captures videos in HD in the H.264 format, which is perfect for uploading to YouTube.

Watch recordings of your best game play on your PC monitor or HD TV set

Once your recordings are on your PC hard disk, you can play them back directly on your computer screen using the included ArcSoft ShowBiz application. Or burn them on a standard DVD-R or DVD-RW disk for playback on a Blu-ray DVD player. You can also transfer the recordings over your home network to your PlayStation 3, Xbox 360, or other high definition media player with full 5.1 channel audio.

Software Included

HD PVR includes ArcSoft ShowBiz, which lets you capture, preview, playback, edit and burn your recordings onto a Blu-ray compatible DVD disc. Next generation Audio formats such as Dolby Surround, Digital 5.1 (AC-3), and Surround used in Blu-ray discs are supported. HD PVR also records in formats which are compatible with playback on a PlayStation 3 or Xbox 360.

HD PVR Gaming Edition comes with a universal Component Video cable, to connect to your Xbox 360 or PS3.
