

XPhones 2400

2.4GHz Wireless Headphones for PCs and Macs

XPhones: The Ultimate Audio Entertainment! XPhones PC-2400 lets you experience the ultimate audio entertainment with your PC or Mac. Using the latest wireless 2.4GHz technology, XPhones allows you to experience your PC or Mac audio, wirelessly with comfortable over-the-ear headphones.

Share with your family. XPhones has the ability to broadcast to more than one headphone. You and your family can enjoy a movie or listen to a concert together in the comfort of your living room.

Easy to install, no CD required! Install XPhones with "Plug and Play". Simply plug in the XPhones USB audio adapter "stick" to your USB port. Your PC or Mac will detect and install the XPhones software automatically.

Virtual Surround Sound. XPhones includes "Dolby™ Headphone" for Surround Sound audio when watching DVD movies. Dolby Headphone delivers 5.1-channel surround sound through XPhones for a richer, more spacious listening experience. The Dolby Headphone feature is available through the included PowerDVD7 DVD player (PC only).

Bass Booster Armed with a bass booster, XPhones gives you the option to increase the bass ambience to your computer games, music or movies.
