

Broadway 2T by PCTV Systems

Get TV on your iPad®
and iPhone® – instantly!

Product Overview

BROADWAY by PCTV Systems is a new way to watch live TV on your Apple® iPhone® and iPad® – at home via Wi-Fi or around the world via the Internet.

BROADWAY is a small stand alone device which connects to your Freeview TV aerial and streams live TV wirelessly to mobile Apple® devices – the iPhone, iPad, and iPod Touch.

Live TV can be watched over your home Wi-Fi network or it can be streamed over the Internet anywhere in the world where your Apple device has an Internet connection.

The BROADWAY networked TV receiver features two Freeview DVB-T tuners, hardware H.264 compression and support for the ultra-fast 802.11n wireless network (Wi-Fi) standard. It connects to your home Wi-Fi router, converts the live TV signal to H.264 format and streams it wirelessly to mobile Apple devices as well as to any PC or Mac.

Now you have access to DVB-T everywhere at your home - even if you live in an area with weak DVB-T signal.

The set-up is as easy as 1-2-3:

1. Connect a DVB-T aerial to Broadway
2. Connect Broadway to your Wi-Fi router
3. Using Wi-Fi on your Apple mobile device, PC or Mac, open a browser and type in <http://distan.tv> You can now fully control Broadway. Scan for TV channels and set up an Internet connection to Broadway.

On your PC, the included all-new TVCenter 6 software makes it easy to watch, time shift and record live TV from BROADWAY. The Dual-Tuner of BROADWAY 2T enables TV streaming to an iPhone or iPad and a PC at the same time.

BROADWAY is also equipped with an Audio/Video input. Thus, by connecting an analog camera to BROADWAY, you turn it into a remote surveillance solution for your iPad or iPhone.

BROADWAY by PCTV Systems comes with a mini rod antenna, TVCenter 6 for Windows, a wall mounting kit and a printed Quick-Install manual.

Target Market

Mobile User/ Traveler are mostly on the way and often abroad and don't want to miss their favorite TV shows or sport events. Thanks to BROADWAY they can now stream their home's TV program en route to their iPad or iPhone via 3G or Wi-Fi wherever they are on the world.

Netbook and Laptop Users: Users of these PC categories who want to watch DVB-T throughout their homes but don't have a sufficient DVB-T signal for indoor reception. Thanks to BROADWAY these users are now enabled to watch TV wherever they have good wireless LAN reception. They can enjoy the portable watch-TV experience which normally only get users with strong DVB-T coverage at their location. The included easy-to-use TVCenter application provides a wide range of TV and PVR features, comparable to those of a high-end set-top box.

Key Features

Stream TV wirelessly to iPhone and iPad

Imagine you can watch your home TV program on your iPhone in a cafe or hotel lobby far from home. BROADWAY streams Live-TV via your home router to your iPhone and iPad wherever you are.

Watching TV on your mobile Apple® device works in your home network (Wi-Fi) as well as over the Internet (Wi-Fi hotspot and 3G).

Stream TV wirelessly to your Mac or Windows PC

Watch live TV on your Mac, anywhere in the world where you have an Internet connection, using the Mac Safari web browser. If you have a PC, you can use the included TVCenter 6 to watch live TV wirelessly, plus pause, rewind and schedule TV recordings.

Stream live cam video to iPhone and iPad

Connect an analog camera to BROADWAY and stream live video and audio from your home to your iPhone and iPad.

Technical Specifications

Minimum System Requirements

- Home network with router
- BONUS: Stream Live-TV over the Internet. Your home router should be connected to the Internet with an uplink speed of min. 256 kbit/s

Windows (with TVCenter 6)

- Microsoft® Windows 7® or Windows Vista with latest Service Pack, 1 GB RAM
- Or Windows XP (32 bit) with latest Service Pack, 512 MB RAM
- PC with 1.5 GHz processor
- Hard disk with min. 1 GB free capacity (20 GB free capacity recommended)
- Sound and graphics with support for DirectX® 9 or higher
- CD/DVD drive for software installation
- Network connection for TV streaming, software updates and activations

Mobile Apple® devices

- iPhone, iPad or iPod Touch with Safari web browser and iOS 3 or newer
- LAN-streaming of live-TV: Your mobile Apple device requires a Wi-Fi connection to the router or access point.
- WAN/Web-streaming of live-TV: Your mobile Apple device requires an internet connection via 3G or an Wi-Fi hot-spot

Tuner

- TV standard: Digital terrestrial DVB-T (MPEG-2, MPEG-4 AVC / H.264)
- Tuning range 174~862 MHz
- Channel bandwidth 7, 8 MHz
- Antenna input: IEC, 75 Ohm

Important notes on DVB-T/ reception:

Please ask your dealer whether DVB-T is available in your region. DVB-T reception is depending on location and might be impaired by thick or steel-enforced walls, and high neighboring buildings. In such environments, an outdoor / roof-top DVB-T antenna is required. Mobile reception of DVB-T, e.g. in a car or train, is in general not possible.
