

Digital (DVB-T)² and analogue TV for your Media Center PC!

Watch analogue and digital TV on your Media Center PC. The WinTV-HVR-1700 MC-Kit includes everything you need to watch, pause and record analogue PAL and digital TV on your Vista Media Center PC. A high quality PCI Express TV receiver and a certified Media Center remote control create a complete upgrade kit for Windows Media Center.

The WinTV-HVR-1700 MC-Kit can be used in either full height or half height PC systems, using the supplied low profile adapter bracket.

WinTV-HVR-1700 MC-Kit makes your PC future proof. WinTV-HVR-1700 MC-Kit can switch between analogue PAL TV and digital TV, so you can watch analogue PAL TV now and receive Freeview TV when it is available in your area. You can also connect your cable TV or satellite TV set top box to WinTV-HVR-1700 MC-Kit, so you can watch, pause and record set top box programs too.

Microsoft certified Media Center remote control included. Control Media Center's functions with the included remote control. Play music, start a

slide show, all from the comfort of your living room couch. And if you have a cable TV or satellite box, the included Media Center IR transmitter can control the channel changing. So you can automatically schedule and record TV from cable TV or a satellite receiver.

WinTV-HVR-1700 MC-Kit is a compact low profile PCI-Express card that fits in all the latest Microsoft Vista Home Premium and Ultimate PCs with a PCI-Express 1x slot. If you have a normal PC or an extra slim one, WinTV-HVR-1200 HD comes with both full height and half height brackets.

WinTV-HVR-1700 MC-Kit is Windows 7 certified.

Hauppauge WinTV v7 - Features

- Watch TV in a windows or full screen
- TimeShift
- Record your TV shows directly to your computers hard drive (MPEG-2)
- EPG (Electronic Programm Guide)

1 DVB-T-Radio is not DAB-Radio.

2 A national accommodation with DVB-T in Germany will be finished in the year 2010. On www.ueberall-tv.de you can see which territory supports DVB-T TV.

3 Media Center is included in Windows XP Media Center Edition 2005, Vista Home Premium or Vista Ultimate.

WinTV-HVR-1700 MC-Kit

- PCI-Express-card for DVB-T and analog TV for Media Center
- Pause analogue or digital TV, with instant replay, skip, fast forward and rewind
- Record digital TV programmes in original MPEG-2 quality
- Record analogue TV to disk with WinTV-HVR-1700's high performance MPEG-2 hardware encoder
- Use Media Center's TV scheduler to automatically record your favourite TV shows
- Playback your recordings at any time on your PC screen
- Use the included Media Center remote to control all media functions, such as digital picture slide shows, music playlists, etc.
- Use Media Center's IR transmitter to control the channels on your satellite or cable TV set-top box
