HD PVR Rocket

New!

HD PVR Rocket, the portable HD Game Recorder for the PS4, PS3, Xbox One, Xbox 360 and PC game systems!

Plug a USB memory stick into the Rocket, plug in USB power, and you'll be recording your gameplay in full 1080p HD

- The HD PVR Rocket is small enough to fit in your pocket and uses H.264 video compression for all recordings. H.264 consumes only one-third of the storage space compared to the MPEG-2 format and gives you amazing audio and video quality!
- Record your best game moments at home or a friends house, or even at a LAN event
- Record game commentary with the built-in audio mixer
- You can also connect the Rocket to your PC, and record directly to your PC's disk drive

Add Game Commentary with the HD PVR Rocket's built-in audio mixer

The Rocket has a 3.5mm microphone input and a built-in audio mixer, so you can record your game commentary while your gameplay is recorded.

You can adjust the volume of your microphone, and mute the microphone when needed. And the built-in mixer supports both powered and unpowered mics.

Create video tutorials with commentary on your favourite games. Get famous on YouTube - show your friends how good you are!

HD PVR Rocket can also record directly to your PC!

Use Hauppauge Capture to record your Rocket videos directly to your PC's disk drive.
