Made for
 iPhone  iPad

Watch live Freeview TV on the new iPad, iPad 2 and iPhone 4S anywhere there is a DVB-T Freeview signal. You can watch Freeview on your iPad in your home, out and about or in the garden. You just need a Freeview over-the-air TV signal.

No Wi-Fi or 3G/4G connection is needed!

myTV 2GO-m works exclusively on any model of the new iPad, iPad 2 and iPhone 4S*.

myTV 2GO-m is simple to install. Just plug myTV 2GO-m into the 30-pin docking connector on your iPad/iPhone, download our free app from the Apple app store and scan for Freeview TV broadcasts in your area. It's that simple!

myTV 2GO-m built in antenna can receive Freeview TV channels within approximately 10 miles of a Freeview broadcast transmitter*.

myTV 2GO-m includes the latest generation digital terrestrial TV tuner

for the best possible over-the-air TV reception. With the built-in battery, myTV 2GO-m allows you to watch up to 9 hours of live TV with an iPad 2 in airplane mode.

Record Freeview TV programmes on your iPad 2 or iPhone 4S*! With myTV 2GO-m plugged-in to the new iPad, iPad 2 or iPhone 4S, you can record Freeview TV broadcasts on the iPad/iPhone internal storage. With the free built-in EPG in the TV application, you can select upcoming digital programmes directly from the guide. You can also pause live TV (Time shifting) at anytime!

myTV 2GO-m is small enough to fit in your pocket yet powerful enough to give you the freedom to watch what you want, where you want.

myTV 2GO-m does not require a dataplan to operate.

Receive unlimited live Freeview DVB-T TV on the new iPad, iPad 2 and iPhone 4S without using your data allowance.

* myTV 2GO-m requires a good Freeview TV signal to display TV. In weak transmission areas, you will not be able to watch TV on your iPad/iPhone.

* In order to record TV, your iPad/iPhone must be turned on.

Model 1390 | EAN 0785 428 01390 9

myTV 2GO-m is easy to setup!

1. Connect your myTV 2GO-m directly to your iPad 2 or iPhone 4S
2. Install our TV app from the app store (no charge)
3. Follow the simple setup menus. Then start watching TV*!

* Where you get sufficient DVB-T (Freeview) reception
