CableCARD receiver

WinTV-DCR-2650

a dual tuner CableCARD receiver
for your Windows 7 PC!

Watch and record basic and premium cable TV on your Windows 7 PC

With dual tuners ... record two TV shows at the same time!

Simple to install via USB

WinTV-DCR-2650 Digital CableCARD receiver features

WinTV-DCR-2650 is a cable TV box for Windows 7 Media Center which uses CableCARD™ technology. With WinTV-DCR-2650, you can watch and record all of your basic and premium cable TV programs on your Windows 7 PC.

Plugs into cable TV directly. No cable box required! And with WinTV-DCR-2650, you do not pay a monthly cable box rental fee. The only on going fees are your monthly cable TV service plus the monthly cost of the CableCARD.

Dual tuners on board! With Windows 7 Media Center you can record two TV programs, or you can watch one TV program while recording another.

All of your cable TV channels, including premium cable channels such as HBO and Showtime, can be watched and recorded with the WinTV-DCR-2650. But keep in mind you still need to have a subscription to these premium channels in order to watch and record them.

WinTV-DCR-2650 is easy to install via a USB connector. It can be used with both notebook and desktop Windows 7 PCs.

Use a standard Windows Media Center remote control (not supplied) to control all TV functions: record, pause, skip, playback, etc.

Package Includes

WinTV-DCR-2650 dual tuner USB CableCARD receiver

Graphics with 64MB memory (or greater)

Sound card

A dual tuner CableCARD receiver for your Windows 7 PC!

WinTV-DCR-2650 is a cable TV receiver box based on CableCARD technology. CableCARD receivers are purchased instead of rented from your local cable TV operator. The only on going fees are your monthly cable service plus the cost of the rental of the CableCARD from your cable operator (which costs around \$5 per month).

With Windows 7 Media Center and the WinTV-DCR-2650, you have an advanced cable TV box (a "DVR" box)

WinTV-DCR-2650 has two tuners, so with Windows 7 Media Center you can record two TV programs at the same time, or you can watch one TV program while recording another. Use the free Windows Media Center Electronic Program Guide to schedule your TV recordings. Record one TV show or record the entire series!

WinTV-DCR-2650 allows you to watch and record premium cable TV channels such as HBO and Showtime

All of your cable TV channels, including premium cable channels such as HBO and Showtime, can be watched and recorded with the WinTV-DCR-2650 and Windows Media Center. But keep in mind you still need to have a subscription to these premium channels in order to watch and record them.

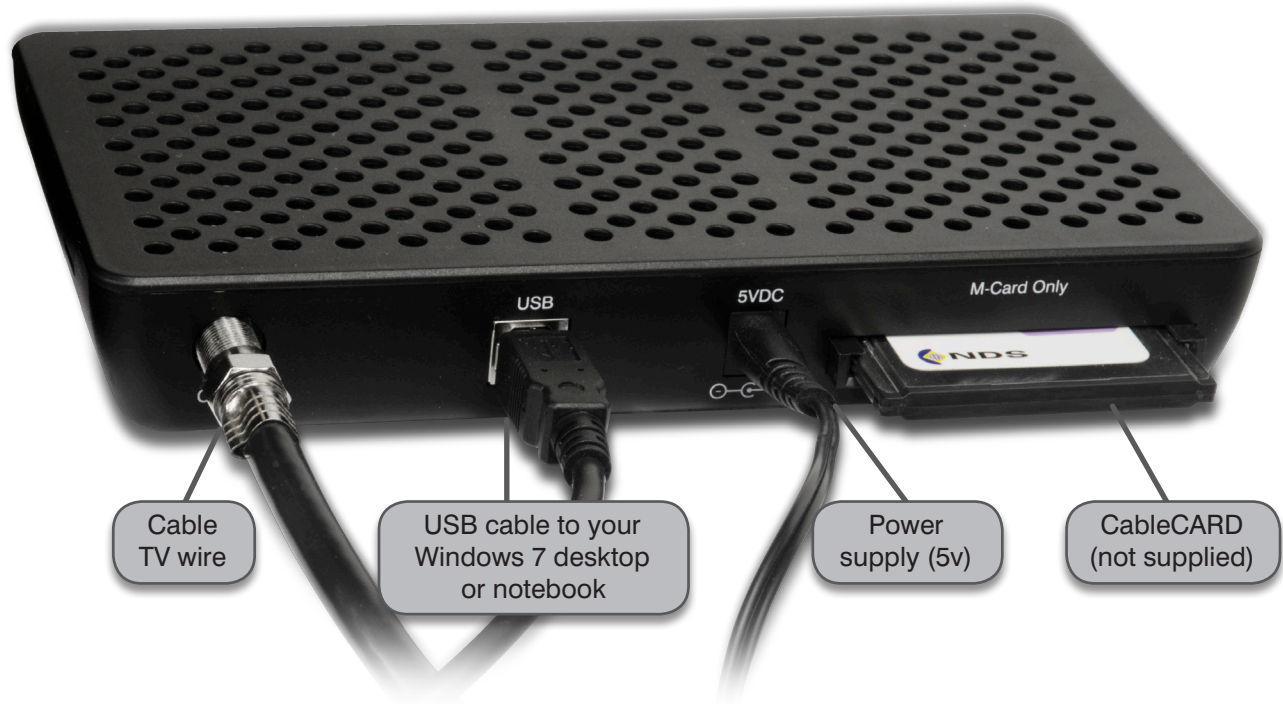

Pay per view and video on demand will not be available through the WinTV-DCR-2650 since it requires a two way communication to your cable operator.

WinTV-DCR-2650 is like a super cable TV DVR box

WinTV-DCR-2650 uses your PC to store recorded TV programs. So if you fill up your hard drive with recorded TV programs, you can easily add a new disk drive to your PC for virtually unlimited TV recording!

There is no monthly fee for the WinTV-DCR-2650. Once you buy it, it's yours to use forever. But you still need to sign up for cable TV service, and you will still need to rent a CableCARD from your local cable operator.

WinTV-DCR-2650 uses Windows 7 with its free Electronic Program Guide.
